

DESIGN A BETTER LEARNING EXPERIENCE

WITH A SMARTER LMS

Demand More From Your LMS

Whether you're implementing a full course online, offering a single training seminar, or creating a hybrid of traditional and online learning, BlueQuill, our innovative learning management system, is scalable and flexible enough to work for your needs.

The BlueQuill learning management system (LMS) is where education and technology meet, seamlessly integrated to provide a smarter, more engaging learning experience for learners, educators and instructional designers alike.

Create Consistency With a Scalable LMS

A state-of-the-art LMS, BlueQuill leverages 20 years of expertise in online education by an accredited university. BlueQuill is an intuitive, drag and drop, tablet and mobile-ready LMS that guides curriculum designers and faculty through the creation and delivery of effective and engaging course instruction. Learner success is tailored to the individual and grounded in easy access to assignments and course content complimented by feature-rich collaboration tools. Instructors can see learner progress and measure achievement and curriculum alignment in real time.

Simple. Authentic. Effective.

BlueQuill makes it easy to create and maintain a consistent education experience. It's turnkey, cloud-based, content rich and adaptable to multiple modes of learning – BlueQuill takes instruction beyond the traditional classroom, wherever and however it's most effective, to help maximize every learning opportunity.

BlueQuill ENABLES YOU TO:

- **Boost learner success with measurable evidence of learning and the ability to see learner achievement in real time**
- **Improve assessment quality and streamline processes through built-in program reviews and assessment data**
- **Measure effectiveness through unique reporting and analytics capabilities**
- **Increase faculty oversight of curriculum**
